

3+ Class Notes - March 2026

First, I want to thank you all for meeting with me last month for our conferences. I enjoyed chatting with you about your wonderful children, and I appreciate you taking the time to meet with me. We will continue our school year working on our shapes, numbers, letters, fine motor skills, social emotional learning and most importantly, we will continue having fun with our friends at preschool!

March will be another fun, busy month in our classroom. We will begin the month learning about oceans and ocean life! We will then read one of my favorite books, *Caps for Sale*, and we will act out the book.

We will learn about the magic of rainbows and then have a week of learning about our community helpers. We will learn about why they are so important to our community and even get to dress up like some! The Kirkland Fire Department will also visit during this week (or perhaps the week before or after). They will show us all of their gear and talk to the kids about safety in the event of a fire. We will also be able to explore their firetruck and ambulance! I will let you know once we have a date solidified for the visit.

Toward the end of the month we will learn about all things that go - trucks, airplanes, trains and more! Then we will end the month talking about Spring and getting ready for Easter!

As always, please reach out with any questions or concerns!

Warmly,

Amanda Cendoya
